

# The TASQ Line

**A durable, air-driven pump, with significantly longer service life, for intermittent flow and pressures.**

## FEATURES:

- Pressures from 100 to 5,000 psi
- Flows to 3.5 GPM (57 ml/min.)
- Sparkless operation
- Compact and portable 11 lbs. (5 kg)
- Teflon based seals – no lubricator needed
- Air-driven – no electricity required or unwanted heat generated

## APPLICATIONS:

- Power Workholding
- Crimping
- Presses
- Tensioning
- Torquing
- Static Pressure Testing

**Tough • Affordable • Simple • Quality**

# The TASQ Line -->

## Specifications:

- Aircraft Grade Aluminum Housing
- Twin PTFE Seals on Hard Chrome Piston Rod
- D03 Valve Pad with 1/4 NPT Cylinder Ports
- 200 Mesh Suction Strainer
- 3/8 NPT Air Port for Supply and/or Gage
- Compatible with Most Hydraulic Oils
- Requires Clean, Dry, Regulated Air 150 psi max. (10 bar)
- No Lubricator Required

TASQ-60 for Power Workholding

**Options:** Reservoir size up to 120 cu. in. (2 liter) gauges, on/off valve, modular D03 valve(s)

<b>TASQ Ordering Information</b>				
<b>Model</b> <small>(number denotes ratio)</small>	<b>Stall Pressure*</b>		<b>Flow*</b>	
	psi	bar	gpm	ml/min.
